PROFESSIONAL SUMMARY

Software Engineer with nearly 2 years of experience developing scalable backend, full-stack, and cloud-based applications. Strong proficiency in Python, FastAPI, Node.js, React, TypeScript, REST APIs, PostgreSQL, MongoDB, AWS, Docker, and microservices architecture. Experienced in designing backend services, integrating APIs, developing AI-powered applications, building reusable application components, and delivering end-to-end software products in Agile development environments.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C#
Backend: Python, FastAPI, Node.js, Express.js, NestJS, REST APIs
Frontend: React.js, Next.js, React Native, Vite, Tailwind CSS, HTML, CSS
Databases: PostgreSQL, MongoDB
Cloud / DevOps: AWS, Docker, Kubernetes, Git, GitHub
AI / GenAI: Generative AI, Large Language Models (LLMs), Agentic Workflows, RAG, Prompt Engineering, Google ADK, OpenAI
Tools: Postman, Figma, Sentry, ComfyUI
Core Concepts: Microservices, System Design, REST APIs, Data Structures & Algorithms, Problem Solving, Agile Development

PROFESSIONAL EXPERIENCE

Founding Software Engineer — Vargah Software Private Limited Nov 2024 – Dec 2025
Hyderabad, Telangana

- Designed and developed Arohaa, a scalable AI-powered platform capable of generating video content directly from textual input.
- Developed full-stack application components using React, FastAPI, Node.js, AWS, and modern frontend technologies.
- Implemented and evaluated different LLM architectures and AI models to address diverse functional and product requirements.
- Built agentic workflows using Google ADK and integrated Gemini 2.5 Pro using few-shot prompting techniques.
- Integrated AI image generation workflows using FLUX Kontext and ComfyUI as part of the content generation pipeline.
- Managed and grew two health and wellness YouTube channels, achieving 36K total views, 1,900 likes, and 388 new subscribers within 20 days, validating the capabilities of the Arohaa platform.
- **Technologies:** Python, React.js, Vite, Tailwind CSS, FastAPI, Node.js, AWS, Google ADK, Gemini 2.5 Pro, FLUX Kontext, ComfyUI, Figma

Software Engineering Intern — Vargah Software Private Limited Feb 2024 – May 2024
Hyderabad, Telangana

- Improved AI gameplay performance for the Hex board game using transposition tables, outperforming traditional alpha-beta pruning approaches.
- Reduced computational overhead using parallel processing and memoization techniques to optimize search performance.
- Engineered and deployed Big Hex, a scalable extension of the existing Simple Hex game supporting larger board configurations.
- Contributed to algorithm optimization and computational efficiency improvements for game AI systems.
- **Technologies:** Unity Engine, C#

SELECTED PROJECTS

Veteran — AI-Powered Career Transition System

- Developed an AI-powered career transition platform that analyzes user skills, experience, and interests to recommend suitable career domains and opportunities.
- Implemented intelligent skill assessment and domain scoring mechanisms to map user profiles to relevant career paths.
- Built an adaptive assessment workflow that dynamically adjusts topic selection and difficulty based on user responses.

- Implemented AI-driven recommendations using LLMs, RAG, and agentic workflows.
- **Technologies:** Python, FastAPI, OpenAI, RAG, Agentic Workflows, PostgreSQL, NestJS

PALATE — AI-Powered Cooking Assistant

- Built an AI-powered cooking assistant for recipe discovery, customization, and step-by-step cooking guidance.
- Implemented YouTube video-to-recipe conversion and intelligent ingredient extraction workflows.
- Experimented with Google ADK to build agent-based workflows for solving complex real-world cooking and recipe management tasks.
- **Technologies:** Google ADK, React Native, TypeScript, Python

HealthKard — Healthcare Web Application

- Developed a healthcare web and hybrid mobile application for managing medical records and appointments.
- Designed responsive user interfaces and integrated backend services for application functionality.
- **Technologies:** React.js, Tailwind CSS, Node.js, MongoDB

RJENest — College Innovation and Entrepreneurship Platform

- Developed a responsive web platform to help students promote innovative ideas and connect with institutional support.
- Created a user-friendly interface to support innovation initiatives and entrepreneurship activities.
- **Technologies:** HTML, JavaScript, Tailwind CSS

EDUCATION

R.V.R. & J.C. College of Engineering Jan 2020 – Jun 2024
Bachelor of Technology in Computer Science and Engineering CGPA: 8.68 / 10

Sri Chaitanya Junior College 2020
Higher Secondary School — M.P.C. CGPA: 9.7

ACHIEVEMENTS

- Published a research paper at AIIDE 2024 on an optimized algorithm for Hex games using intra-move transposition tables to improve computational efficiency.
- Achieved 1st place in three collegiate web development competitions.
- Secured 3rd place in a national-level programming challenge.
- Validated the Arohaa AI content generation platform through rapid audience growth across YouTube channels.
